

Public Works Project of the Year Award

Purpose The APWA Public Works Project of the Year Award was established to promote excellence in the management and administration of public works projects by recognizing the alliance between the managing agency, the consultant/architect/engineer, and the contractor who, working together, complete public works projects.

Awards are given in four divisions:

1. Projects less than \$2 million
2. Projects of \$2 million, but less than \$10 million
3. Projects of \$10 million to \$100 million
4. Projects more than \$100 million

and five categories:

1. Structures—to include public structure preservation/rehabilitation, municipal buildings, parks, etc.
2. Transportation—to include roads, bridges, mass transit, etc.
3. Environment—to include treatment and recycling facilities, landfill reclamation projects, sewer projects, etc.
4. Historical Restoration/Preservation—to include historical restoration, preservation and adaptive reuse of existing buildings and structures and facilities, etc.
5. Disaster or Emergency Construction/Repair—to include the techniques and timing for safety, community relations, environmental protection, adverse conditions and additional considerations.

Eligibility Public works is defined as the physical structures and facilities that are developed, owned, and maintained by public agencies to house governmental functions and provide water, power, waste disposal, transportation, and similar public services in accordance with established public policy.

To be eligible for nomination, a project must have been “substantially completed” and available for public and/or agency use within two calendar years prior to nomination. If a project has multiple phases or segments, then “substantially completed” will be construed as that point when the final phase or segment is 90% completed and available for public and/or agency use.

A project may only be nominated once for recognition as “Project of the Year” under any category.

Selection Criteria to be used in the selection process include:

1. Use of good construction management techniques and completion of the project on schedule;
2. Safety performance and demonstrated awareness of the need for a good overall safety program during construction;
3. Community relations as evidence by efforts to minimize public inconvenience due to construction, safety precautions to protect public lives and property, provision of observation areas, guided tours, or other means of improving relations between the agency and the public;
4. Demonstrated awareness for the need to protect the environment during the project. This includes any special considerations given to particular environmental concerns raised during the course of the project;
5. Unusual accomplishments under adverse conditions including, but not limited to age or condition of the facility, adverse weather, soil or other site conditions over which there is no control; and
6. Additional conditions deemed of importance to the public works agency such as exceptional efforts to maintain quality control and, if value engineering is used, construction innovations as evidenced by time and/or money-saving techniques developed and/or successfully utilized.

Nomination Process Nominations of projects can be made by the managing public agency or APWA chapters. Six copies of submittal are required and should be sent to APWA National. Nominations will not be returned.

Deadline March 3, 2008

Presentation A designated representative of the public agency, contractor, and consultant are presented a plaque at the Awards Recognition Ceremony during the APWA International Public Works Congress and Exposition and winners are featured in APWA's publications.
